The Gladiolus

Gladiolus: "Diminutive of Latin *gladius*, a sword, from the shape of the leaves of the first described species."

Varieties selected by our experts and verified as such by the Leading Gladiolus Societies both here and abroad. Finest Quality Stock that has been selected by carefully trained employees — then especially treated in storage during the winter months to assure you the finest disease and insect free bulbs. Treated with D D T powder as we are packing your order. It is our aim and to our interest that you received the finest quality that will produce exhibition blooms in your garden.

FOR THE GARDEN AND FOR INDOOR DECORATION

Few flowers have so richly profited from the skill and taste of the hybridists' continued ambitions as the Gladioli. Through variation, selection and breeding, the comparatively inconspicuous flowers brought from Cape Colony some hundred and fifty years ago, have been re-furbished, elaborated, glorified, until memory of their simple early state is quite lost in the wonder of newly acquired colors, markings, bewitching ruffles and widely flaring chalices. The color range of the Gladiolus of today includes every tint and shade possible.

No blooms are more valuable in the midsummer and autumn garden than Gladioli. Their use is almost without limitation. The range of color available today enables them to share in any scheme. If the planting be properly timed they may be brought into bloom any time from June to November (and under glass, from November to June). The flowering season may be advanced or prolonged by planting in berry baskets or pans, keeping them in a protected frame until ready to set outdoors into the garden where a vacancy invites it.

They are invaluable for cut flowers, and it is well to have a few hundred bulbs planted in some out-of-the-way place, for a cutting patch for indoor and porch decoration. It is interesting in this connection to choose varieties whose colors will harmonize with the decorations of the various rooms of your home. In cutting the blooms four or more leaves should always be left upon the plant; this helps to restore nourishment to the parent corms.

Gladioli will give satisfactory results in any good garden soil. The depth of planting for the corms differs with the character of the soil. The lighter the soil, the deeper the corms should be set, and in dry seasons this deep planting is of great advantage, as it insures a cool and desirable environment for the roots. Deep planting has the further advantage of very largely doing away with the necessity of staking. In heavy, moist soils, however, there is danger in deep planting, as the soil may become too wet and cause the young shoots and even the corms to decay.

The general method is to plant in rows from $1\frac{1}{2}$ to 4 feet apart, depending upon the method of cultivation to be employed. Dig a trench 5 inches deep and 2 inches wide at the bottom. Place the corms on the bottom of the trench 3 inches to 5 inches apart and then fill the trench with soil.

They like plenty of air and sunshine under which condition they will grow to perfection. In dry seasons they should be thoroughly watered; a little sprinkling in the evening is of only slight benefit; give them a thorough soaking so that the soil is wet 5 inches deep and then leave them alone for a week.

Cultivate after every rain or watering; keep the surface of the soil loose and open; give the oxygen a chance to get into the soil where things are growing.

Do not use fresh manure at planting time. Apply barnyard manure the previous fall or use bone meal in the spring. *Scheepers' Bulb Food* is best. (See page 17.)

Unpack the bulbs as soon as received and give them a thorough airing; keep in a good dry cellar until ready to plant.

YOU MAY HAVE BLOOMS IN YOUR GARDEN FROM JUNE UNTIL FROST

(We have ideal storage facilities and will be happy to keep the bulbs for you, making shipments at intervals during the growing season.)

Plant some Gladioli every week commencing as soon as all danger of frost is over. By keeping the bulbs in a cool, dry place, about forty degrees, they will keep and remain dormant as late as August. This will give you flowers from late June until frost.

Plant a few of the bulbs in berry baskets in early March, placing them in a frost-proof cellar or frame where they can make roots; when all danger of frost is over, plunge them, basket and all, into the places in the garden where they are wanted, and you will have fine blooms in late May and early June.

It is always well to have a quantity of Gladioli planted at various times in such baskets or in pots and pans growing in frames so that from time to time you may be able to fill vacant spaces in your borders by plunging these in for quick or immediate effect, very early or very late in the season.

Scheepers' Gladioli

"A taste for flowers denotes a beautiful character which almost all persons of true refinement have." —BALZAC

This selection is arranged in conformity with the classification adopted by the Gladiolus Society. All varieties marked "Exhibition" are especially suitable for exhibition purposes, florets measure over 4 inches in diameter. Varieties marked "Decorative" produce florets measuring over 3½ inches in diameter. In selecting these varieties, special stress is laid on their value for decorative purposes. Varieties marked "Small Flowered" produce florets measuring less than 3½ inches across. They are especially selected for their decorative value, for use in bowls and for table decorations. This class includes the type previously listed as "Primulinus." (See Miniatures, page 10.)

Varieties marked "Early" bloom in from 70-80 days. Those marked "Midseason" come into flower in 85-90 days, while those marked "Late" take a few days longer to bloom.

(For Color Index of Gladioli, See Inside Back Cover)

ABU HASSAN. (Midseason-Exhibition) A glossy dark blue-violet which defies competition in this color class; buds appear black. To those who remember the popular "Pelegrina" we wish to state that Abu Hassan excels in both color and growth. It is the finest dark violet blue Gladiolus yet introduced. The color contrasts when combined in a bouquet with "Mother Kadel" is very charming. Extra fine cut flower and always a prize winner. *See illustration*, page 12. \$1.75 for 10; \$15.00 per 100.

ARTIST. (Early-Decorative) A new introduction of rare merit. Lovely lilac-violet with delightful narrow pencil stripe of white through each petal for a beautiful effect. Strong grower with many of the well placed florets open at one time. Should be in every collection. \$1.35 for 10; \$11.00 per 100.

BEAUTY'S BLUSH. (Midseason-Decorative) For a true blush pink this variety cannot be superseded. Most readily described as a frosty white, delightfully and lightly flushed rose-pink with a touch of warm cream in the throat. Seven to nine well placed florets are open at one time on the strong tall spike. A prize winner at every show. \$1.50 for 10; \$12.50 per 100.

BIRCH RED. (Midseason-Exhibition) The best deep red Gladioli introduced to date. Florets are arranged in a double row. Fine tall grower with 8 of the 19 buds open at one time. Beautiful when arranged in a bouquet with "Spotlight." \$1.50 for 10; \$12.50 per 100.

BLUE BEAUTY. (Midseason-Decorative) The best of the new blue originations. Light blue with edges of petals overlaid violet-blue. Large, wide-open florets of fine round form, 6 to 8 open at a time. Excellent spike with 20 or more buds. Exquisite when combined with "Crinkle Cream" or "Dr. Fleming." *See illustration*, page 5. \$1.55 for 10; \$13.00 per 100.

BURMA. (Midseason-Exhibition) Heavily ruffled florets of rose-red lighter in the throat. Well placed blooms are held on strong stiff stems with as many as 10 open at one time. Exquisite when arranged in a bouquet with either "Leading Lady" or "Mother Kadel." Very popular; always a prize winner. *See illustration*, page 11. \$1.50 for 10; \$12.50 per 100.

CARNIVAL. (Midseason-Exhibition) Bright scarlet-red with large snowy white throat. Good strong grower, fine for exhibition. *See illustration*, page 6. \$1.85 for 10; \$16.00 per 100.

CIRCE. (Midseason-Exhibition) Russet-orange with a deep red blotch that is bordered with a thin yellow band. Very attractive. Six to eight of the eighteen buds are open at one time on a strong stem. Placement of the florets on the stem is perfect. Prize winner. \$1.35 for 10; \$11.00 per 100.

CRINKLE CREAM. (Midseason-Decorative) Pale yellow, has very large florets that open wide and are well placed on strong stems. Heavily ruffled, beautiful in a combination with either "Burma" or "Abu Hassan." Very outstanding. \$1.65 for 10; \$14.00 per 100.

DIEPPE. (Midseason-Exhibition) This is by far one of the finest "Glads" introduced to date. The salmon-scarlet florets are six inches wide, well placed and with seven to nine open at one time. Florets are well rounded of fine texture and delightfully ruffled. *See illustration*, page 11. \$1.50 for 10; \$12.50 per 100.

DR. FLEMING. (Early-Exhibition) Very bright pink shaded lighter on the lower petals and to almost white deep in the throat. A very pleasing color combination. The florets are large and heavily ruffled at the edges. The full spike has ten florets open at one time. Highest honors at the shows. \$1.35 for 10; \$11.00 per 100.

ELIZABETH THE QUEEN. (Midseason-Exhibition) Beautiful lavender-mauve, the color running far down in the throat of the extra large florets. It has a reddish stipled feather deep in the throat with some flaking of the same color running through the lower petals, which seems to add character to the bloom. The long flower stems with 8 and more blooms open at a time make this an ideal exhibition variety. Beautiful under artificial light. Winner of highest honors including an Award of Merit at the Quebec Show. Best variety winner at Exposition Institute Agricola, Belge Au, Canada. Award of Merit New York. \$1.45 for 10; \$12.00 per 100.

FIRE GLEAM. (Midseason-Exhibition) Fiery scarlet with a warm glow to the bloom with a thin white line in the throat. The florets are nicely ruffled and well placed. You will see from our color illustration that this is a very beautiful "Glad." *See color illustration*, page 5. \$2.45 for 10; \$22.00 per 100.

FRIENDSHIP. (Early-Decorative) A new introduction of exceptional merit. A frosty shade of pure pink with a waxy white and cream throat to add to its beauty. Large, well rounded florets, opening wide of excellent texture and being nicely ruffled. An exhibition variety of rare beauty. Long list of prizes to its credit as the best pure pink. *See illustration*, page 5. \$2.25 for 10; \$20.00 per 100.

GENERAL EISENHOWER. (Midseason-Exhibition) Deep clear pink, undoubtedly the best pink introduced to date. 8 enormous florets open at one time, very well placed and held on strong stiff stems. \$1.45 for 10; \$12.00 per 100.

GRAND MONARCH. (Late-Exhibition) Maroon-violet with a darker marking in the throat. A very beautiful new introduction and a leader in the dark toned Gladioli. Strong stems and many florets open at one time; for a delightful effect arrange with "Circe" and "Crinkle Cream." \$1.35 for 10; \$11.00 per 100.

GRETA GARBO. (Midseason-Exhibition) So soft is the flesh pink of this beautiful variety that one would be tempted to describe it as a white, flushed soft pink; the slight touch of cream in the throat adds to its beauty. The form of the florets is lovely and they are well placed on strong stems. A delightful arrangement for a bouquet would be "Morning Kiss." \$1.35 for 10; \$11.00 per 100.

HEART O'GOLD. (Early-Exhibition) Snow white with golden marks at the throat. A delightful color combination, ideal for decoration. Nice butterfly-shaped florets. *See illustration*, page 5. \$2.50 for 10; \$22.50 per 100.

HOPMAN'S GLORY. (Midseason-Exhibition) Clear soft yellow and a very beautiful variety. It may well be considered an "Early Flowering" variety as it is the first of the soft yellows to flower. Beautiful when arranged in a bouquet with two other 'early' varieties, "Dr. Fleming" and "White Gem." \$1.35 for 10; \$11.00 per 100.

LADRONE. (Late-Exhibition) Deep salmon with a golden throat. A lovely variety that is ideal for decoration, nice willowy spikes with florets well placed. *See illustration*, page 6. \$2.25 for 10; \$20.00 per 100.

LEADING LADY. (Midseason-Exhibition) Creamy white with a slightly darker throat, considered by many as the best in this color class, winning prizes at all shows. Heavy spike with many florets. \$1.60 for 10; \$13.50 per 100.

MARGARET BEATON. (Midseason-Exhibition) Still very popular. It has been a repeated prize winner in all shows. Snowy white with a vermilion-pink blotch deep in the throat, greatly adding to its distinctiveness. Tall spikes with 6½-inch florets well arranged, and 8 open at a time. Should be in every collection. *See illustration*, page 30. \$1.50 for 10; \$12.50 per 100.

MORNING KISS. (Early-Exhibition) Fine pure white flowers, tall, straight spikes with eight and more florets open at one time and the buds showing color for a fine effect. Best of the early flowering varieties. \$1.35 for 10; \$11.00 per 100.

"To a mind now happily reverted to the primitive confidence in souls everywhere indwelling and creating sympathies between all things, the bond of kinship between man and nature were drawn ever closer, and it seemed a wholly natural belief that the changes of the visible universe, affecting things which lived an almost personal existence, should be instinct with the deeper meaning of events in the drama of human existence."
—W. COMPTON LEITH

Scheepers' New 1954 Novelty Gladioli

Many of the varieties are offered this year for the first time; however, they have been tested under all climatic conditions and we feel confident in presenting them to our select clientele. This past season, at all of the leading flower shows, they have been awarded highest honors. They will eventually replace many of the old "standbys".

OUR Gladioli Corms reach you absolutely free from thrips

(For Finest Results Spray the Plants)

Infestations may inadvertently come in from a neighboring untreated planting or may originate from bouquets of infested cut flowers that are consigned to the refuse heap after they have lost their freshness. In such cases spraying is recommended as a preventive or control.

Since the thrips are difficult to find on the foliage, a careful examination of the plants should be made as soon as they are up five or six inches, and if any "silvered" spots are noticed, the plants should be sprayed with a solution of tartar emetic, brown sugar, and water, prepared as indicated below. This solution does not injure the Gladiolus foliage as does the paris green and brown sugar combination formerly recommended.

	<i>Small Quantity</i>	<i>Large Quantity</i>
Tartar Emetic ..	1 ounce	2 ounces
Brown Sugar	4 ounces	8 ounces
or Molasses ..	5 tablespoonfuls	10 tablespoonfuls
Water	1½ gallons	3 gallons

The tartar emetic, like the brown sugar, is soluble in water. These ingredients should be stirred in a small quantity of water until dissolved and then diluted up to the quantity desired. If molasses is used, it can be added after tartar emetic has been dissolved. No agitation is required with this spray.

they have been treated with DDT during winter storage and again just before shipping.

Careful spraying, repeated weekly or every ten days until flowering begins, will do much toward insuring a normal crop of flowers. This can only be accomplished by destroying the insects before they have an opportunity to enter the buds.

To obtain the best results it is necessary to use a sprayer capable of sufficient pressure to produce a fine mist spray that will cover all leaf surfaces of the plant with tiny droplets. Do not apply so much spray that these droplets will unite and run off. If rain occurs within twelve to twenty-four hours after the application, the spray should be repeated.

If the spraying has been started early, and while the plants are small, the infestation should be so greatly reduced that no further treatments need to be made after the appearance of the first flowers. However, the last spray application should be so timed that it will be made as close to the beginning of the flowering period as possible.

For the convenience of our clients, we will be pleased to supply tartar emetic at the following prices:

Tartar emetic: ½-lb. package @ \$1.25 each
1-lb. package @ 2.25 each

Bulbous Plants

*Spread some "Scheepers' Bulb Food" over the ground before you cultivate for the first time in Spring, then work it in as you cultivate. Repeat this performance when the flower buds appear. These two feedings will result in exhibition blooms at flowering time. For naturalistic planting we suggest a third feeding in September.

We have been asked by many friends to tell them what sort of plant food we use in growing our choice bulbs. We told them we had a special formula that gave health and long life to these plants. A few prevailed upon us to make up a quantity and let them try it in their own gardens. We did.

The extraordinary success that these gardeners met with and the enthusiasm resulting from it, have encouraged us to offer all our friends and patrons a chance to use the very same plant food in their attempt at producing healthy, luxuriant flowers with strong stems and exquisite colorings.

And so we present this opportunity for you to order some of SCHEEPERS' BULB FOOD, and we recommend that you try it with your next planting. It is almost entirely composed of organic matter and may be used with absolute safety in connection with the planting of bulbs at any time, in any soil, or with any other plants. It is also economical—a teaspoonful for each bulb is the average requirement.

A good plan is to spread a small quantity over the area where the bulbs are planted or around the growing plants before you cultivate. Worked into the soil in this way will show splendid developments in plants and flower buds.

We are sure that if you take advantage of this offer you will find it a very happy investment. (Directions for use contained in each bag or can.)

A BARE SPOT IN THE GARDEN — REQUIRE LITTLE CARE — DISEASE RESISTANT
FRAGRANCE LIKE A LILY WITH THE LINGERING PERFUME OF THE GARDENIA

After careful study and trial of all the leading varieties that have been produced by the best hybridists in the country, we feel that our list of varieties is the finest obtainable. They appear on the Honor Roll of the 100 best varieties as selected by members of The Hemerocallis Society.

From early spring until frost this group of "Lilies" demands no special care in the garden. They are unsurpassed as to hardiness, freedom from disease and insect pests. Their five-month flowering period of bloom—still more for a southern garden where they will bloom two or three times a year—makes them valuable as a cut flower, in a perennial border, on slopes or banks to prevent soil erosion and for naturalizing in the garden or field.

Of easy and simple culture, they demand a reasonably moist soil, fairly rich, and prefer, but do not require, slight shade.

Beautiful Garden Lilies

*Plant Them Now — Then Enjoy Their Beauty and Fragrance
in Your Garden This Summer
They Increase in Beauty with Each Season's Growth*

So that you may succeed with these inspiring plants and to obviate disappointments, we have selected, after many years of experimenting and careful study, from a host of varieties, the limited few that succeed in American gardens under ordinary care, when planted in the spring.

THE GOLDEN-RAYED LILY — LILIAM AURATUM MACRANTHUM IN A HAPPY LOCATION

Color illustration, page 29

AURATUM. A veritable "Peacock among Lilies" and very robust. We offer imported Japanese grown bulbs only. There is a lingering charm about the garden in August. One feels the sense of departing beauty and hurries to enjoy what color and fragrance kind Summer has left in her flight. One of the best of all legacies is "Auratum," the golden-rayed lily of Japan, which was discovered on the slopes of snow-capped Fujiyama, growing wild and untouched in all the glory of its beauty.

This is one of the noblest of all lilies, favoring a cool, thin woodland where it is damp at the roots. Not a woodland plant in the sense that it grows in the thick of the forests, but it flourishes on the fringes of the woods, in glades and clearings, always among vegetation, which, while screening the lower part of the stem and keeping the ground cool, leaves the sun free to play on the blooms.

AURATUM MACRANTHUM. (Platyphyllum) This is the robust growing form; height 4 to 5½ feet, the stem is stout and attains a considerable height, the leaves are broad; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all, and, in our opinion, superior to the type.

We have been successful in securing the same special strain of bulbs that we handled prior to the war. They are all especially selected for us and are free from disease. See color illustration, page 29.

Jumbo Size 13 to 14 inches in circumference, \$1.75 each; \$5.25 for 3; \$17.00 for 10.

Extra Large Size 11 to 13 inches in circumference. \$1.25 each; \$3.50 for 3; \$11.00 for 10; \$25.00 per 25.

Large Size 10 to 11 inches in circumference. \$1.20 each; \$3.00 for 3; \$9.50 for 10; \$22.50 per 25.

CENTIFOLIUM. A beautiful and prolific lily; when established a sensation in the garden. In general appearance resembles a huge *Lilium Sulphureum* or *Brownii*, with long tubular, white flowers, colored and streaked externally with brown and flushed internally with yellow deep down into the throat of the blossom. A giant; 4 to 6 feet high. Absolutely hardy and free from disease. Mid-July flowering, plant 8 inches deep; likes full sun. Permanent in the garden for many years. See color illustration, page 29.

Extra Heavy Selected Bulbs: \$2.25 for 3; \$7.00 for 10; \$16.50 for 25.

FIRE KING. A NEW lily of very outstanding merit. It is by far the most brilliant lily in cultivation today. The blossoms are vermilion-scarlet with a peppering of small black dots running deep into the throat; the pistil is scarlet and the anthers deep brown for a charming contrast. We have seen as many as 40 of the brilliant flowers on a single 4 foot stem. The flowers face up and out from the stem; greatly enhancing its beauty in the garden and when used as a cut flower for indoor decoration. It is free from disease, hardy and naturalizes readily. Flowers from the end of June to the end of July and is long lasting when cut. Sure to become one of the most popular garden lilies. Plant 8 inches deep. See illustration, page 28.

Extra Heavy Selected Bulbs: \$1.25 each; \$3.50 for 3; \$11.00 for 10; \$25.00 for 25.

LILIUM FIRE KING — See page 27

GEORGE C. CREELMAN. One of the outstanding introduction of recent years. The *true* Creelman Lily. Beautiful — permanent — prolific — hardy — dependable — easy to grow. Award of Merit, Royal Horticultural Society. This Lily is not to be confused with “seedlings” of the Lily, sometimes offered as Lilium Creelman. “Creelman” is beautiful in form and color, and artistic, while sturdy, virile, permanent, dependable and disease resistant. The long-lasting flowers, which are very large, often measuring 8 inches in length, carried in large numbers on strong, long stems, with fine foliage, resemble a Regal Lily of the best and truest type, with the bronzy tones more pronounced and a more intense yellow in the throat. It blooms 2 weeks after the Regal Lily, many flowers opening at one time. We have counted 35 perfect flowers and buds on a 6-foot spike. Very strong and vigorous grower, the entire plant has an appearance of well-being. We have found this Lily to be entirely free from ordinary diseases to which so many other Lilies are subject. Easiest of culture and one of the hardiest. Stem-rooting. Plant 10 inches deep. Extra heavy, specimen bulbs, limited stock, \$2.00 each; \$5.75 for 3; \$17.50 for 10; \$40.00 for 25. Selected strong flowering bulbs, \$1.50 each; \$4.00 for 3; \$12.50 for 10; \$30.00 for 25.

Lily blooms are beautiful arranged in a corsage — especially recommended for this purpose are:

Auratum Macranthum	Speciosum Magnificum
Henryi	Tigrinum Flore Pleno
Speciosum Album Novum	Tigrinum Splendens

HENRYI. One of the best border Lilies, reaching 8 feet and more in height when established, and bearing more than twenty flowers of a rich, deep orange-yellow. The petals of the flowers are rolled back like in the Speciosum Lily and they are very handsome. The stamens boldly diverge from it. The anthers are conspicuous for their size, color and extremely delicate poise. A partially shaded place, sheltered from winds, suits it best. It is a beautiful Lily. Stemroots; plant ten inches deep. August-September flowering. *See illustration, page 31.*

Jumbo Bulbs: \$1.75 each; \$5.25 for 3; \$17.00 for 10. Extra Selected Bulbs: \$1.00 each; \$2.75 for 3; \$8.50 for 10; \$19.00 for 25.

JAPONICUM. “The Pink Lily.” Also known as Krameri. This is one of the few “pink” Lilies of our gardens, and a very lovely thing it is. The flowers are carried horizontally on stems 3 feet high. It is a lily so beautiful and of a color so lovely that it should be in every garden. It has been known to give as many as seven blooms to the stem, though one and two flowers to a stem the first year is usual. The funnel-shaped, finely formed flowers are six inches and more in length, and as much across, of a beautiful clear pink color often shaded blush. The soil generally advised for it is a light loam, while some claim it is finest in a peaty soil. It roots from the stem as well as from the bulb, and therefore should be planted deep, fully eight inches. June flowering, plant so that it will have slight protection from mid-day sun. Our bulbs are from the New Improved Strain. *See color illustration, page 35.*

Extra Heavy Selected Bulbs: \$2.85 for 3; \$9.00 for 10; \$17.50 for 25; \$60.00 per 100.

Extra Selected Bulbs: \$2.00 for 3; \$6.50 for 10; \$12.50 for 25; \$47.50 per 100.

*"All still and Lily-scented,
The garden seemed to say:
'Oh, weary one, come, enter
And cast your cares away.'
For tall and white the Lilies
Like guardian angels stood,
To ward away the evil
And encompass the good.
To turn away thoughts world-wise,
To want and see and hear
The God-like, silent message
Of things that bless and cheer."*

—LYMAN

REGALE. (The Regal or Royal Lily) One of the most beautiful, and one of the hardiest Lilies in cultivation, Lilium Regale is truly a royal Lily, worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with long, linear-lanceolate foliage. Center of flower flushed with yellow, shading to white at the outer edges; externally the flowers are streaked with brown on the "ribs," shaded through the almost translucent petals with a delightful pearly tint; the contrast between the rich wine color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful.

The Regal Lily is very floriferous and, when thoroughly established, bears as high as eighteen and twenty flowers during the season. Like most other Lilies, it should be planted deep—at least 9 inches, should have good drainage, and when growing should be watered copiously with liquid manure as they are gross feeders. They succeed in any good rich garden soil.

In the herbaceous border, planted in clumps of five to twenty-five bulbs, they are especially attractive among the Delphiniums and other July-flowering perennials. Where these magnificent Lilies are planted in quantity, the air in the cool of the morning and in the evening is laden with a delightful perfume, exhaled from every blossom. See color illustration, page 29.

Extra Heavy Specimen Bulbs: \$1.25 each; \$3.50 for 3; \$11.00 for 10; \$25.00 for 25.

Extra Selected Bulbs: \$1.00 each; \$2.75 for 3; \$8.50 for 10; \$20.00 for 25.

SPECIOSUM LILIES

Fragrant — Dependable — Beautiful

Permanent in your garden

Lilium Speciosum both pure white and pink is deservedly one of the greatest favorites as a border plant, of daring as well as beautiful form. The petals are well rolled back and are handsomely spotted, often branded with distinct color. The style is thrown out in a curved line of much grace and strength. The stamens boldly diverge from it. The anthers are conspicuous for their size, color and extremely delicate poise. In addition to all these attractive qualities it has a strongly waved outline to the petals, which adds much to its beauty.

To see the plant growing impresses one with a feeling of vigor and well being. Must be planted deeply as it produces an unusually strong mass of stem-roots.

See color illustration, page 29.

It may be grown to perfection in a rich, open, woodland soil overlying a stiff, sandy loam, into which its long roots can wander as they please. On the richness of the top-soil depends the growth of the stem and flowers, and it is no exaggeration to say that one cannot mulch this lily too much. As it opens its flowers late in the season, August and September, it is probably best to plant Lilium Speciosum in full sunshine. Plant 10 to 12 inches deep, of course among ground shading shrubs, making sure as to the drainage.

"When my garden smiles and smells."

THE PURE WHITE STRAIN

SPECIOSUM ALBUM NOVUM. Flowers are large, of the purest white, with beautiful golden yellow anthers. Stem-roots, August-September flowering. Grows 2½ to 4 feet high.

Extra Heavy Selected Bulbs: \$1.35 each; \$3.90 for 3; \$12.50 for 10; \$30.00 for 25.

Extra Selected Bulbs: \$1.10 each; \$3.15 for 3; \$9.50 for 10; \$22.50 for 25.

THE PINK STRAINS

SPECIOSUM MAGNIFICUM. (Improved Rubrum) Rich ruby-carmine, margined white; stout of substance and broad of petal. Improved "Rubrum." This variety stands out prominently on account of its vigorous growth, 3½ to 5 feet high, as well as the size and depth of coloring of the blooms. Stem-roots, August-September flowering. *See color illustration, page 29.*

SPECIOSUM MELPOMENE. The delicate beauty of the lighter colored flowers makes this variety most desirable. Deep carmine-crimson, intensified by a narrow margin of white. Stem-roots, August-September flowering.

Montbretias

Graceful, Sparkling Flowers of Midsummer.

They reflect the colors of the advancing season and lend a charming gaiety and lightness to the borders. For the best effect the bulbs should be set only a few inches apart, and in groups of not less than ten, toward the front of herbaceous borders or shrubbery. Thus planted, the sheaves of narrow leaves and slender, wiry arching stems strung with brilliant flowers, like miniature Gladioli, have the appearance of little fountains of bright color—rose, scarlet, yellow, orange, red, often marked with brown. They will flower for many weeks, from August into late October and set at intervals in a border, where blue and white flowers predominate, are delightful indeed with such gay patches of color. They may be planted from the earliest spring days until late June, according to the flowering dates you prefer. Long lasting qualities make Montbretias most desirable for cutting.

GEORGE DAVISON. Pale orange-yellow, tinted with deeper orange externally. Very large flowers, good well branched stems. Received Award of Merit R.H.S. \$1.05 for 10; \$8.00 per 100.

HIS MAJESTY. Widely expanded flowers, remarkable for their great size, they are of pronounced rich yellow in the center, shading to brilliant scarlet with three segments heavily covered towards their tips with a rich crimson. The largest of all Montbretias. *See color illustration.* \$1.45 for 10; \$12.00 per 100.

JAMES COEY. Very large, well expanded flowers of perfect form, with smooth broad petals, rich deep vermilion scarlet with golden orange luster, center yellow with crimson blotches, very handsome. \$1.15 for 10; \$9.00 per 100.

ROSEA. Pretty rose colored tubular flowers. A charming variety that is distinct and very free flowering. Splendid for table decorations. \$1.05 for 10; \$8.00 per 100.

STAR OF THE EAST. One of the finest Montbretias ever raised. Flowers are pale orange-yellow, with lemon-yellow eye, expanding quite flat and held erect. The flowers are very large with best blooms measuring 5 inches in diameter. Magnificent and unequalled. \$2.00 for 10; \$17.50 per 100.

Planted with Gladioli they form an imposing contrast and last a long time in bloom. In every way they may be treated like Gladioli, but south of Philadelphia the bulbs may be left out-of-doors over the winter with a light covering and will increase and give better results every year.
